

Quality Enhancement Plan

Career Exploration

GOAL: Enable each student to select an appropriate academic program based on their identified interests and career objectives in order to facilitate the timely completion of their academic goals. This will ensure that students **"know" they are on the right track to a great career.**

Each student will make an informed program selection when enrolling at the college. Students will take a **career exploration and skills assessment**, and work with a Student Services Advisor who has been trained in career advising to make an informed decision about the career path they are selecting. **Students will "know" their career + academic goals!**

Each **Career and Technical** student will complete a **Pathway to Employment (PTE)** course that is aligned with their career cluster in their first year at the College. **Students will "know" they have selected the right program.**

Each **College Transfer** student (Associate in Science and Associate in Arts) will complete a career exploration module in their **ACA** course, during their 1st year at the College. **Students will "know" all the possibilities in their chosen field.**

Each student will receive **continued support** in aligning career and academic goals throughout their time at the College. **Students will "know" the courses they need to graduate and achieve their career goals.**
